

2. Python program to copy odd lines of one file to other

Program:

```
a=open('filer.txt','r')
b=open('try.txt','w')
c = a.readlines()
for i in range(0, len(c)):
    if(i%2 != 0):
        b.write(c[i])
    else:
        pass

b.close()
print("Copied File : ")
b=open('try.txt','r')
d=b.read()
print(d)
a.close()
b.close()
a = open('filer.txt','r')
d = a.read()
print("Original File: ")
print(d)
a.close()
```

Output:

Copied File :

Python was developed in 1990s.

python is not python snake

Original File :

Python is an interpreted, highlevel language.

Python was developed in 1990s.

Python emphaziz on code readability

python is not python snake

python is dynamically typed and garbage collected.
