

16. Create a single string separated with space from two strings by swapping the character at position 1.

```
print("Create a single string separated with space from two strings by  
swapping the character at position 1")  
print("\n")  
  
a = str(input("Enter first string : "))  
b = str(input("Enter second string : "))  
  
a2 = b[:1] + a[1:]  
b2 = a[:1] + b[1:]  
  
print(a2, " ", b2)
```

Output:

Enter first string : Hello

Enter second string : Good Morning

Gello Hood Morning
