13. Create a list of colors from comma-separated color names entered by user. Display first and last colors.

```
s1=[]
n=  int(input("Enter the list size: "))
print("\n")
print("Enter",+n," color names: ")
for i in range(0,n):

    item = input()
    s1.append(item)

print("The list of colors is : ",s1)
print("First and last colors in the list are : ")

print(s1[0],"and",s1[n-1])
```

output

Enter 4 color names:

blue

red

yellow

green

The list of colors is : ['blue', 'red', 'yellow', 'green']

First and last colors in the list are :

blue and green
